The BMW service indicator lights are considered by many to be totally useless for indicating when you should service the car. The cheapest, ugliest solution for turning off the service light is to cover them up with black tape. If you want to be more adventurous, you can remove the instrument cluster and cut the wire going to the lights.

BMW Service indicator lights - Unofficial BMW

318i motors with the valvetronic motor loves the EML light after about +/-140 000km. Its usually by the stepper motor that adjust the timing and BMW loves replacing this motor at a hefty price. But it does not usually solve the problem for its the worm gear where the stepper motor runs on that wears or forms a ridge and BMW sends it away to be machined again.
