impending changes in the field with an emphasis on practical issues, recent developments, and emerging concepts.

Advances in Surgical Pathology: Mesothelioma

Surgical management of endometrial cancer is nonetheless a challenge. Until recently, many hospitals use extensive surgery with pelvic lymph node resection for all women. Two recent multicenter randomized controlled trials found that this procedure provided no benefits in terms of overall or disease-specific and recurrence-free survival in women with early-stage endometrioid endometrial cancer (EEC) [3 , 4].

Implications of a two-step procedure in surgical ...

A stepwise approach to pathology diagnosis in these subspecialty topic areas in surgical pathology and cytopathology will be addressed. The course will also provide guidance in the use and interpretation of molecular and immunohistochemical testing in difficult diagnostic scenarios.
