The Aero Commander 500 family is a series of light-twin piston-engined and turboprop aircraft originally built by the Aero Design and Engineering Company in the late 1940s, renamed the Aero Commander company in 1950, and a division of Rockwell International from 1965. The initial production version was the 200-mph, seven-seat Aero Commander 520. An improved version, the 500S, manufactured after ...

Operation and Networking The ekr 500 digital unit touch's controller can be mounted away from the control device. It allows for universal handling, saves power, and is easy to wire. A galvanically isolated CAN bus is used for networking with other BST eltomat controllers or a machine control by costumers. Communication with your machine SPS is also possible via the optional C2E coupler.
