Mechanical Data Processing – Data processing results improved dramatically with the addition of typewriters and calculators. However, speed and errors were still very much a function of “human operators.” Electronic Data Processing – Modern data processing uses computers to facilitate processing requirements. Based on data processing ...

What Are the Steps in Business Data Processing

On April 15, 2020, the French Data Protection Authority (the “CNIL”) published the final version of its standard (“Referential”) concerning the processing of personal data for core Human Resources (“HR”) management purposes. That Referential was adopted following a public consultation launched by the CNIL on April 11, 2019. The CNIL also published a set of questions and answers ...

CNIL Publishes Standard on HR Data Processing | Privacy ...

Data processing is the conversion of data into usable and desired form. This conversion or “processing” is carried out using a predefined sequence of operations either manually or automatically. Most of the processing is done by using computers and thus done automatically. The output or “processed” data can be obtained in various forms.
