A cone is a pyramid with a circular base that has sloping sides which meet at a central point. In order to calculate its surface area or volume, you must know the radius of the base and the length of the side. If you do not know it, you can find the side length ( $s$ ) using the radius ( $r$ ) and the cone's height ( $h$ ).  $s = \sqrt{r^2 + h^2}$
