Physics Of The Aurora And

Aurora. When energetic charged particles enter the earth's atmosphere from the solar wind, they tend to be channeled toward the poles by the magnetic force which causes them to spiral around the magnetic field lines of the earth. They are energetic enough to ionize air molecules, so a considerable

Physics of the Aurora: Earth ...

Physics of Aurora. High speed energetic particles collide with atoms in Earth's atmosphere at a height of anywhere from about 50 to a few hundred miles above Earth's surface to cause the aurora. These high speed particles, which are usually electrons, originate from space, specifically from the solar

Download File PDF Physics Of The Aurora And Airglow International

wind, blowing outward from the Sun. When the electrons from space strike an atom or molecule in Earth's atmosphere, they give one of the electrons in the atom an energy boost.
