Storage Area Network Essentials by Barker, Richard (ebook)

A storage area network (SAN) or storage network is a computer network which provides access to consolidated, block-level data storage. SANs are primarily used to access storage devices, such as disk arrays and tape

Network

access to storage.

SANs are typically

composed of hosts,

switches, storage

elements, and storage

devices that are

interconnected using a

variety of technologies,

topologies, and

protocols.

(disks and tapes) and

servers that are

connected to a

common

communication and

data transfer

infrastructure such as

Fibre Channel. The

common

communication and

data transfer

mechanism for a given

deployment is

commonly known as

the storage fabric.
